

Yves Verboven, EU4HealthSolution
EU4HealthSolutions

Yves Verboven recently founded EU4HealthSolutions for which he operates as an External Consultant - Sr. Advisor and Partner in EU Consortia of EU4Health calls. As part of an EU4Health project he is building out a community to unlock EU regulation for Innovation and provided advise to the DGOS in France in order to apply a value-based approach for "les Achats Complexes. He continues to advise MedTech Europe for some critical files, formerly headed MedTech Europe's market access and economic policies, and was responsible for the transformation towards the Value of Innovation and Partnership Access model whereby the flagship is to advance towards an economic advantageous value-based procurement model and collaborative innovation procurement and partnerships.

He obtained an electro-mechanical engineering degree at the University of Leuven and a post-graduate MBA. Over the years, he has built the expertise in clinical trials, health economic and the application of a value based healthcare approach within a European Health Care environment.

His area of focus is to foster the accessibility and use of innovation and innovative solutions of value involving medical and digital technologies. This within an increasingly stringent European Regulatory and National Policy environment in order to ensure an investment and offering of high value care and to do so in economic most advantageous ways by means of a partnership approach and value-based awarding contracting.
