Clinical Pharmacy Department

Mediterranean Institute for Transplantation and High Specialized Therapy (ISMETT) - Research Center - Palermo, Italy
University of Pittsburgh Medical Center (UPMC) - Italy

EAHP President and Board Members

EAHP Nomination Committee

EAHP General Assembly

Dear Colleagues,

I have been the Director of Pharmacy Services at the Mediterranean Institute for Transplantation and Advanced Specialized Therapies (ISMETT) in Palermo, Italy for approximately 14 years. In this time, I have been able to collaborate with my colleagues at the University of Pittsburgh Medical Center in projects that produced increased efficiencies in the department and increased patient safety and positive clinical outcomes.

I have always been committed at scientific level in Italy collaborating actively with my scientific society, both in Europe collaborating with ESCP and EAHP, and both in USA through the collaboration with the University of Pittsburgh Medical Center.

During the last 3 years, my contribute was provided through:

- My involvement in EMA's Clinical Trial Information System group. I have also linked my expertise on clinical trials which was very useful during the last 3 years for inputting to consultations/discussions on this topic at EU level
- The development of two tools (European List of Emergency Medicines & European COVID-19 drugs calculation tool) in collaboration with some colleagues and Board members. Both the tools aim at supporting the work of all the country members/ hospital colleagues.
- My contribution to Medicines shortages supporting EAHP' surveys (2019 Medicines Shortage Survey & COVID-19 Survey), engaging in consultations and in discussions on this topic with other stakeholders.
- Revision of several position papers; Lead and co-lead of several topics and support to the EPSA students.

I hope the general assembly would like to support me in continuing my contribution to the EAHP, so I could continue in supporting hospital pharmacists in achieving more strength, recognition, and visibility of their profession.

I believe that assisting EAHP I will be able to combine my skills with my passion to motivate, inspire and set pharmacy practice standards in Italy and throughout all European countries.

Sincerely,

Piera Polidori
