Complejo Hospitalario Universitario de Santiago de Compostela  
Santiago de Compostela

## Objective

To show the ability of **Spanish pharmacy registrar** with the current document "**Assessment of Registrar Competency Pharmacist Hospital Pharmacy (ARCPH)**" to carry out the overall management of a **Pharmacy Department** after completing his training

## Methods

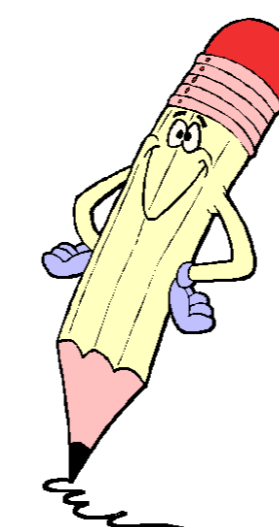

Once he finished this rotation, the senior pharmacist **EVALUATES** every task carried out using a range between 0-3 (minimal rating = 0 points, 3 points maximum rating) according to the indications of ARCPH.

([http://www.sefh.es/sefhpdfs/EVALUACION\\_POR\\_COMPOTENCIAS\\_VF\\_2014.pdf](http://www.sefh.es/sefhpdfs/EVALUACION_POR_COMPOTENCIAS_VF_2014.pdf))

## Results

- ❖ The registrar was trained in all areas include in the CTP.
- ❖ In the assessment areas, the following score was obtained:

- Evaluation and selection of drugs (2.3)
- Inventory management (1.9)
- Masterful formulation (2.8)
- Validation of the prescribing and dispensing of drugs (2.6)
- Drug information and health products (2.4)
- Artificial nutrition (2.1)
- Outpatient pharmaceutical care (2.7)
- Direction and management of PS (1.9)

**ARCPH**

The average overall assessment of the evaluated areas was 2.33, thus reaching a level of training listed as "optimal".

## Conclusions

- A spanish pharmacist registrar trained according to the CTP is able to develop an overall management of the PS in a PLH.
- The fir examination and four year training are good and necessary for the hospital pl specialisation
