ПРАКСЕ

The beginning of the implementation of Good Pharmacy Practice (GPP) guidelines for delivery of pharmacy services in hospital pharmacy settings.

The final phase of the project “Implementation of Antibiotic Reconstitution/Dilution Database in Serbia, Croatia, Slovenia, Bosnia and Herzegovina, North Macedonia and Montenegro in Co-Operation with Spain” led by Pharmaceutical Association of Serbia-Hospital Pharmacy Section in collaboration with national associations of participating countries and mentored by Hospital Pharmacy Service of Gregorio Marañón General University Hospital, Madrid.

The final phase (March 2021-May 2022) included:

- ✓ Implementation of knowledge, attitude and practice (KAP) surveys regarding antibiotic reconstitution/dilution in different hospital settings
- ✓ Development of country-specific antibiotic reconstitution/dilution databases
- ✓ Development of the smartphone applications for both Android and iOS operating systems
- ✓ Presentation of our web-based system and mobile applications at the national Symposium
