

# Establishing a medicine donation circuit for non-governmental organisations at a pharmaceutical service in the Basque Country (Spain)

*Ariadna Martin Torrente, Itziar Palacios Zabalza, María Olatz Ibarra Barrueta, Maialen Palacios Filardo, Garazi Miron Elorriaga*  
 Pharmacy Service, Hospital Galdakao – Usansolo, Bizkaia, Spain

## Background and importance

- ✓ Establishing the circuit of execution, preparation, distribution, and delivery of medicine to Non-Governmental Organisations (NGO) from the Pharmaceutical Service (PS) of a tertiary hospital in the Basque Country (Spain).
- ✓ The circuit has been designed taking into account the criteria in a context of humanitarian donations, published and updated by the Spanish Agency of Drugs and Sanitary Products (AEMPS) on March 16<sup>th</sup>, 2022.

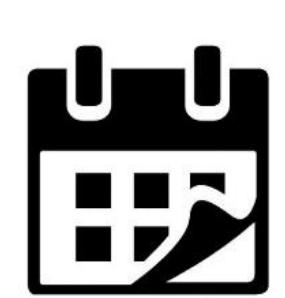

## Aim and objectives

- ✓ To optimize the functioning and the management of the procedures and an accessible and effective communication system in the PS.
- ✓ To allow being faster and more efficient during its preparation than before.

## Materials and methods

## Results

November 2021-  
September 2022

100 active ingredients (AI)

Guatemala; Rumania;  
Ukraine; Senegal

15.198 units of AI

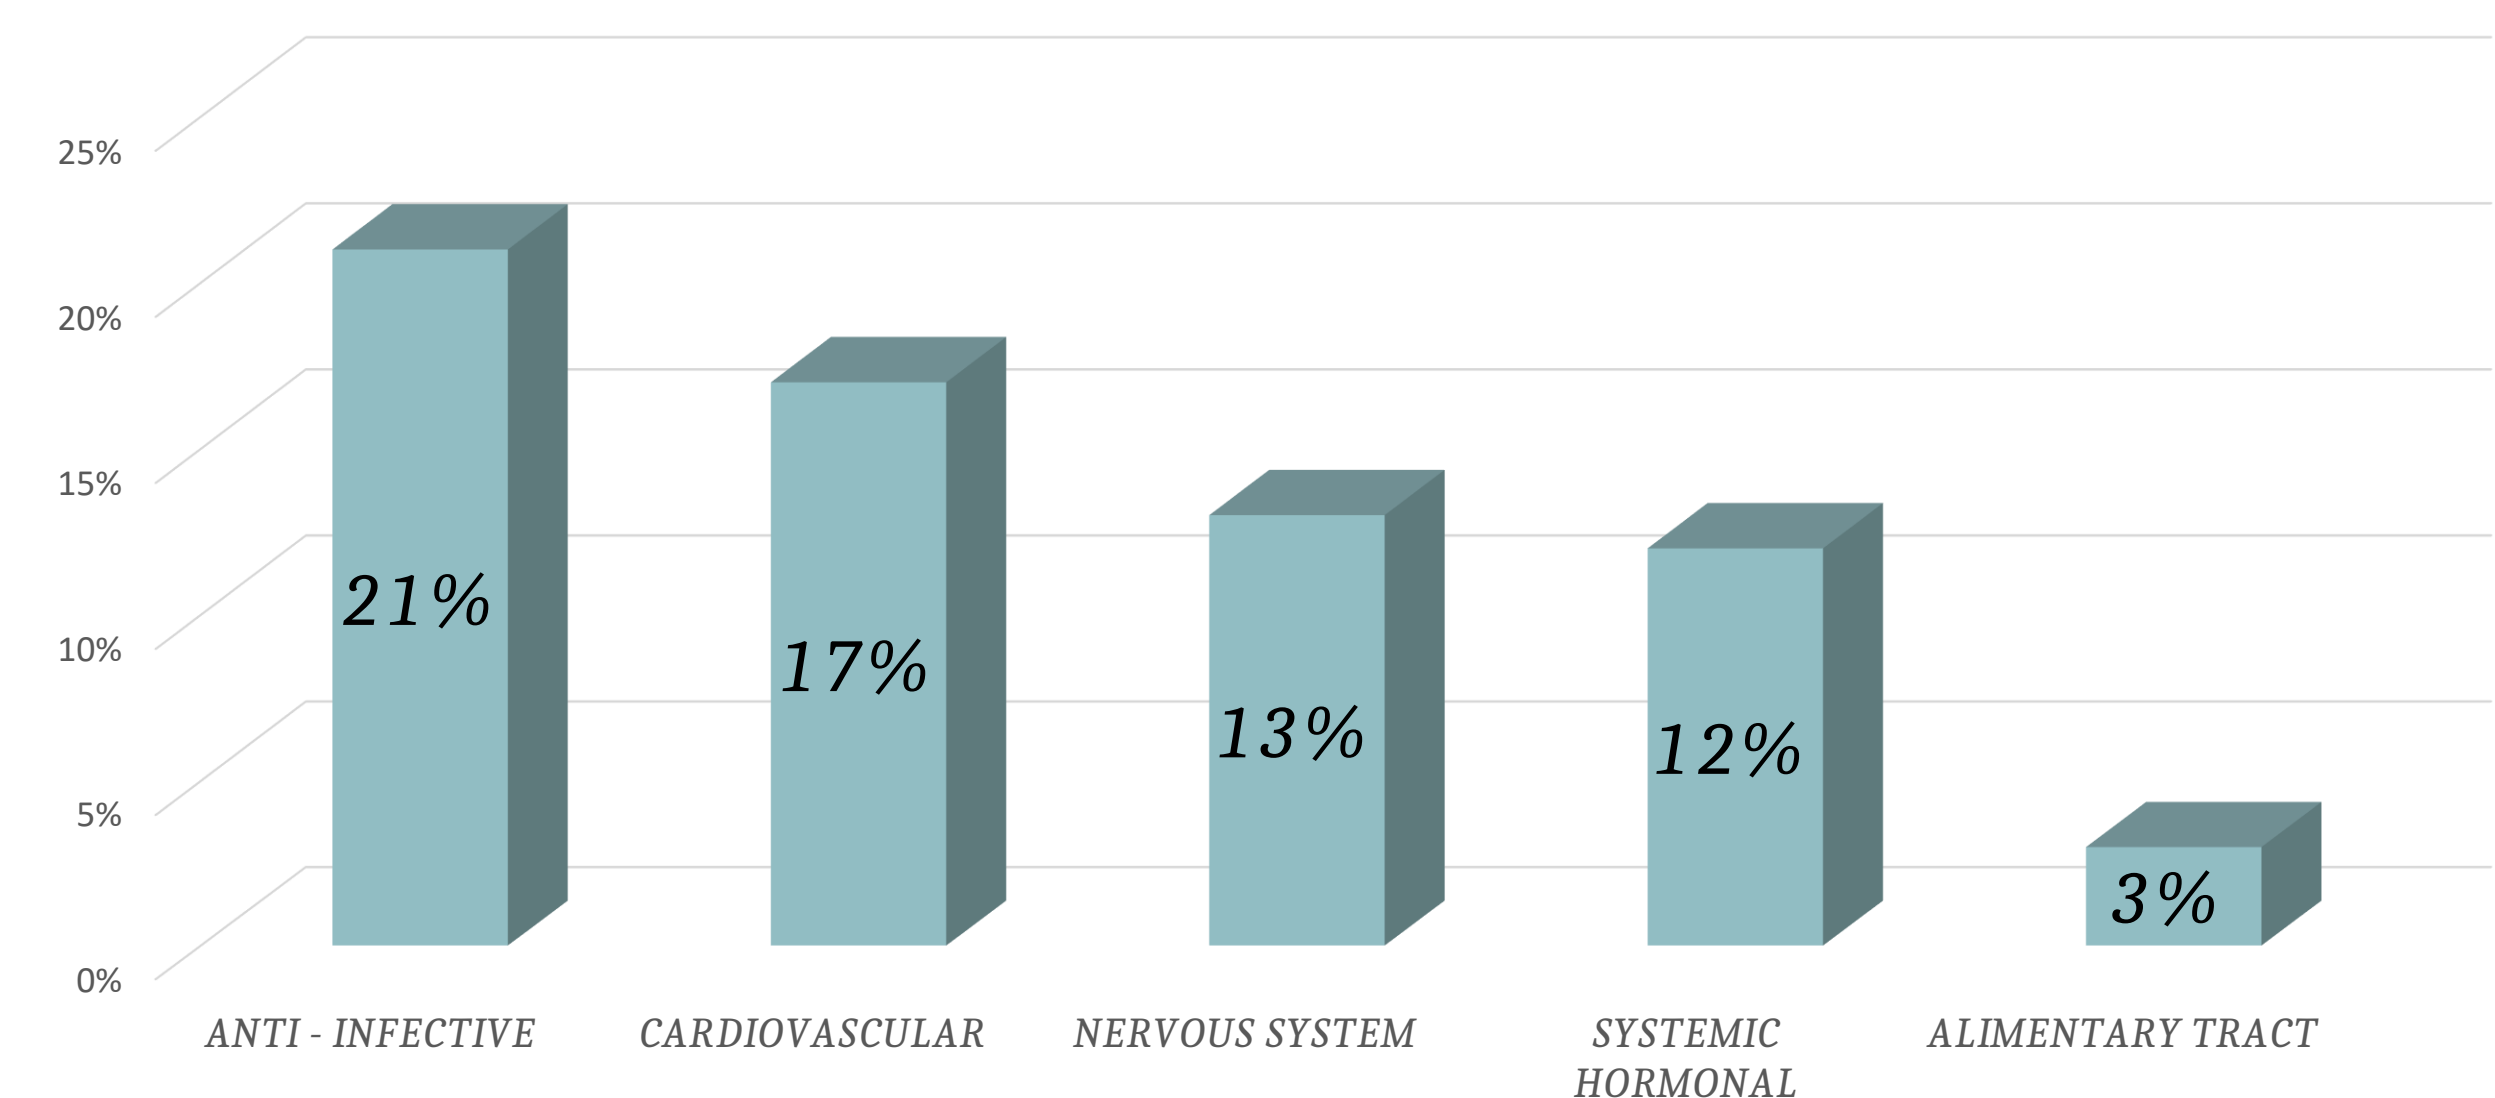

7 donations

Included in the model lists of  
essential medicines

ATC classification

## Conclusion and relevance

- ✓ The project is easily enforceable in any Spanish PS that is willing to process a donation at any given occasion
- ✓ Creation of a standard list including common medications
- ✓ Connect to our internal program in order to be faster when preparing the donation
