

Statement Implementation Learning Collaborative Centres (SILCC)

Application form-SILCC Fellow

Please keep in mind that all hospital pharmacists applying for participation in the SILCC programme need to assess the level of Statement implementation within their hospitals by doing an official assessment of their hospital pharmacies using the online self-assessment tool: <http://sat.eahp.eu/en/home?p=summary&a=4250>

This application form needs to be sent to EAHP at statements@eahp.eu with the following attachments:

- A PDF Copy of your "Assessment Summary" (showing the scores) - first summary you get once you have finalised the assessment showing the overall score and the score for each of the 6 sections
- A PDF Copy of "My Assessment" - list of all 44 Statements with the answers you gave
- A PDF Copy of "My Action Plan"

The results from the self-assessment tool will not be shared with SILCC Hosts nor posted on the website. The assessment of your pharmacy should be done by the Chief Pharmacist/Director of Pharmacy or with their support and approval. SILCC Fellow applicants need to have the approval of their Chief Pharmacist/Director of Pharmacy to apply for the programme.

Please keep in mind that the results from the Self-Assessment will only be shared (as part of the application process with):

- The EAHP Implementation team
- The EAHP Board of Directors
- The Board of your national hospital pharmacy association

Name:	<input type="text"/>	Last Name:	<input type="text"/>
Telephone number:	<input type="text"/>	Position:	<input type="text"/>
Hospital/Institution you work at:	<input type="text"/>		
City/Town:	<input type="text"/>	State/Province:	<input type="text"/>
Country:	<input type="text"/>	P.O. Box:	<input type="text"/>
Chief Pharmacist / Director of Pharmacy from your hospital:			
Name:	<input type="text"/>	Last Name:	<input type="text"/>
Email:	<input type="text"/>	Telephone number:	<input type="text"/>

1. Formation and description of your hospital

Please include all your relevant diplomas and qualifications:

How many years of experience do you have as hospital pharmacist?

Your hospital is:

- A general Hospital
- A teaching hospital (including general care)
- A specialist hospital (e.g. children, oncology, mental health)

How many beds are served by your hospital?

- Less than 100
- 100 to 500
- 501 to 1000
- More than 1000

How many pharmacists are employed by your hospital? (full time equivalence)

2. Details from the SILCC Host you would like to join (you can find all SILCC Hosts by visiting <http://statements.eahp.eu/evidence-map/SILCC>):

1st Choice: Name of the Hospital/Institution you want to integrate:

City/Town:

State/Province:

1st Choice: Name of the Hospital/Institution you want to integrate:

City/Town:

State/Province:

Please contact EAHP implementation team at statements@eahp.eu if you have not been able to identify any SILCC Host suitable for you.

3. Information about the training you want to receive:

Please select from the list below which Statements your hospital pharmacy could provide training on (**please select up to 5 Statements**):

Section 1 - Introductory Statements and Governance

- Statement 1.1: "The overarching goal of the hospital pharmacy service is to optimise patient outcomes through working collaboratively within multidisciplinary teams in order to achieve the responsible use of medicines across all settings."
- Statement 1.2: "At a European level, 'Good Hospital Pharmacy Practice' guidelines based on the best available evidence should be developed and implemented. These guidelines will include corresponding human resources and training requirements and assist national efforts to define recognised standards across the scope and levels of hospital pharmacy services."
- Statement 1.3: "Health systems have limited resources and these should be used responsibly to optimise outcomes for patients. Hospital pharmacists should develop, in collaboration with other stakeholders, criteria and measurements to enable the prioritisation of hospital pharmacy activities."
- Statement 1.4: "All hospitals should have access to a hospital pharmacist who has overall responsibility for the safe, effective and optimal use of medicines. Health authorities should ensure that each hospital pharmacy is supervised by a pharmacist with appropriate working experience in the hospital setting, and explicit demonstration of competence in hospital pharmacy."
- Statement 1.5: "Hospital pharmacists should work with all relevant stakeholders to develop hospital pharmacy human resource plans covering the breadth of hospital pharmacy practice. These should be aligned to engage hospital pharmacists as supervisors in all steps of all medicine use processes to meet health needs and priorities across public and private sectors that optimise medicines use and patient outcomes."
- Statement 1.6: "Hospital pharmacists should take the lead in coordinating the activities of multi-disciplinary, organisation-wide Drug & Therapeutics Committees or equivalent. They should have appropriate representation as full members of these Committees which should oversee and improve all medicines management policies."
- Statement 1.7: "Hospital pharmacists must be involved in the design, specification of parameters and evaluation of ICT within the medicines processes. This will ensure that pharmacy services are integrated within the general Information and Communication Technology (ICT) framework of the hospital including electronic health (eHealth) and mobile health (mHealth) procedures."

Section 2 - Selection, Procurement and Distribution

- Statement 2.1: "Hospital pharmacists should be involved in the complex process of procurement of medicines. They should ensure transparent procurement processes are in place in line with best practice and national legislation, and based on the principles of safety, quality and efficacy of medicines."
- Statement 2.2: "Hospital pharmacists should take the lead in developing, monitoring, reviewing and improving medicine use processes and the use of medicine related technologies. Responsibility for using these processes may rest with other health care professionals and may vary according to the medicine, the medicine related technology, the health care setting and the multidisciplinary team delivering care."
- Statement 2.3: "Hospital pharmacists should coordinate the development, maintenance and use of a medicines formulary system, which may be local, regional and/or national. The medicine formulary system should be linked to guidelines, protocols and treatment pathways based on the best available evidence including patient outcomes and pharmacoeconomic evaluations where these are available."
- Statement 2.4: "Procurement should be according to the medicine formulary and informed by the formulary selection process. A robust process should also be in place to appropriately procure medicines not included in the formulary where their use is indicated for the safe and effective care of individual patients."
- Statement 2.5: "Each hospital pharmacy should have contingency plans for shortages of medicines that it procures."
- Statement 2.6: "Hospital pharmacies should have responsibility for all medicines logistics in hospitals. This includes proper storage, preparation, dispensing, distribution and disposal conditions for all medicines, including investigational medicines."
- Statement 2.7: "Hospital pharmacists should be involved in the development of policies regarding the use of medicines brought into the hospital by patients."

Section 3 - Production and Compounding

- Statement 3.1: "Before pharmacy manufacture or preparation of a medicine, the hospital pharmacist should ascertain whether there is a suitable commercially available pharmaceutical equivalent, and if necessary, discuss the rationale for this decision with the relevant stakeholders."
- Statement 3.2: "Medicines that require manufacture or compounding must be produced by a hospital pharmacy, or outsourced under the responsibility of the hospital pharmacist."
- Statement 3.3: "Before making a pharmacy preparation, the hospital pharmacist must undertake a risk assessment to determine the best practice quality requirements. These must consider premises, equipment, pharmaceutical knowledge and labelling."
- Statement 3.4: "Hospital pharmacists must ensure that an appropriate system for quality control, quality assurance and traceability is in place for pharmacy prepared and compounded medicines."
- Statement 3.5: "Hazardous medicines should be prepared under appropriate conditions to minimise the risk of contaminating the product and exposing hospital personnel, patients and the environment to harm."
- Statement 3.6: "Hospital pharmacists must ensure that an appropriate system for quality control, quality assurance and traceability is in place for pharmacy prepared and compounded medicines."

Section 4 - Clinical Pharmacy Services

- Statement 4.1: "Hospital pharmacists should be involved in all patient care settings to prospectively influence collaborative, multidisciplinary therapeutic decision-making; they should play a full part in decision making including advising, implementing and monitoring medication changes in full partnership with patients, carers and other health care professionals."
- Statement 4.2: "All prescriptions should be reviewed and validated as soon as possible by a hospital pharmacist. Whenever the clinical situation allows, this review should take place prior to the supply and administration of medicines."
- Statement 4.3: "Hospital pharmacists should have access to the patients' health record. Their clinical interventions should be documented in the patients' health record and analysed to inform quality improvement interventions."
- Statement 4.4: "All the medicines used by patients should be entered on the patient's medical record and reconciled by the hospital pharmacist on admission. Hospital pharmacists should assess the appropriateness of all patients' medicines, including herbal and dietary supplements."
- Statement 4.5: "Hospital pharmacists should promote seamless care by contributing to transfer of information about medicines whenever patients move between and within healthcare settings."
- Statement 4.6: "Hospital pharmacists, as an integral part of all patient care teams, should ensure that patients and carers are offered information about their clinical management options, and especially about the use of their medicines, in terms they can understand."
- Statement 4.7: "Hospital pharmacists should inform, educate and advise patients, carers and other health care professionals when medicines are used outside of their marketing authorisation."
- Statement 4.8: "Clinical pharmacy services should continuously evolve to optimise patients' outcomes."

Section 5 - Patient Safety and Quality Assurance

- Statement 5.1: "The "seven rights" (the right patient, right medicine, right dose, right route, right time, right information and right documentation) should be fulfilled in all medicines-related activities in the hospital."
- Statement 5.2: "Hospital pharmacists should ensure the development of appropriate quality assurance strategies for medicines use processes to detect errors and identify priorities for improvement."
- Statement 5.3: "Hospital pharmacists should ensure their hospitals seek review of their medicines use processes by an external quality assessment accreditation programme, and act on reports to improve the quality and safety of these processes."
- Statement 5.4: "Hospital pharmacists should ensure the reporting of adverse drug reactions and medication errors to regional or national pharmacovigilance programmes or patient safety programmes."
- Statement 5.5: "Hospital pharmacists should help to decrease the risk of medication errors by disseminating evidence-based approaches to error reduction including computerised decision support."
- Statement 5.6: "Hospital pharmacists should identify high-risk medicines and ensure appropriate procedures are implemented in procurement, prescribing, preparing, dispensing, administration and monitoring processes to minimise risk."
- Statement 5.7: "Hospital pharmacists should ensure that the medicines administration process is designed such that transcription steps between the original prescription and the medicines administration record are eliminated."
- Statement 5.8: "Hospital pharmacists should ensure accurate recording of all allergy and other relevant medicine-related information in the patient's health record. This information should be accessible and evaluated prior to prescription and administration of medicines."
- Statement 5.9: "Hospital pharmacists should ensure that the information needed for safe medicines use, including both preparation and administration, is accessible at the point of care."
- Statement 5.10: "Hospital pharmacists should ensure that medicines stored throughout the hospital are packaged and labelled so to assure identification, maintain integrity until immediately prior to use and permit correct administration."
- Statement 5.11: "Hospital pharmacists should support and implement systems that allow traceability of all medicines dispensed by the pharmacy."

Section 6 - Education and Research

- Statement 6.1: "Undergraduate pharmacy curricula should include experience of hospital pharmacy practice. The role of all hospital healthcare practitioners, including hospital pharmacists, should be integrated into the curricula of other health professionals."
- Statement 6.2: "All those involved in medicines use processes must be able to demonstrate their competency in their roles. Hospital pharmacists should participate in the development of European-wide competency frameworks to ensure standards of best practice are met."
- Statement 6.3: "A European-wide framework for initial post graduate education and training in hospital pharmacy with an assessment of individual competence is essential. In addition, hospital pharmacists should engage in relevant educational opportunities at all stages of their career."
- Statement 6.4: "Hospital pharmacists should actively engage in and publish research, particularly on hospital pharmacy practice. Research methods should be part of undergraduate and postgraduate training programmes for hospital pharmacists."
- Statement 6.5: "Hospital pharmacists should be actively involved in clinical trials of medicines."

Could you please provide a brief outline of the training or experience that you are planning to achieve in a host hospital? (max 200 words)

Do you have the approval of your Chief of Pharmacist/Director of Pharmacist to become a SILCC Fellow and to receive training on the aforementioned Statements?

- Yes
 No

For how long is the hospital willing to release you?

What languages do you speak?

Is your own hospital (or some other organisation) providing you with financial help during the training?

- Yes
 No
