Firma del Farmacista: _____

A customized request form for nutritional products

WHY WAS DONE?

THERAPEUTIC INTERVENTION

Nutrition is a crucial therapeutic intervention that, when managed correctly, significantly improves clinical outcomes

WHAT WAS ACHIEVED?

1

IMPROVED CLINICAL OUTCOMES

Effective nutrition reduces or prevents complications such as pressure ulcers, infections, and organ dysfunction

2

THERAPEUTIC MONITORING

The hospital pharmacy actively monitors all nutritional therapies prescribed within the hospital

WHAT IS NEXT?

Training days

Product selection

Training on selecting the most appropriate dietary product for each patient

Handling and Administration

Training on handling and administration of nutritional products
