

Specialized Expertise

Significant Impact

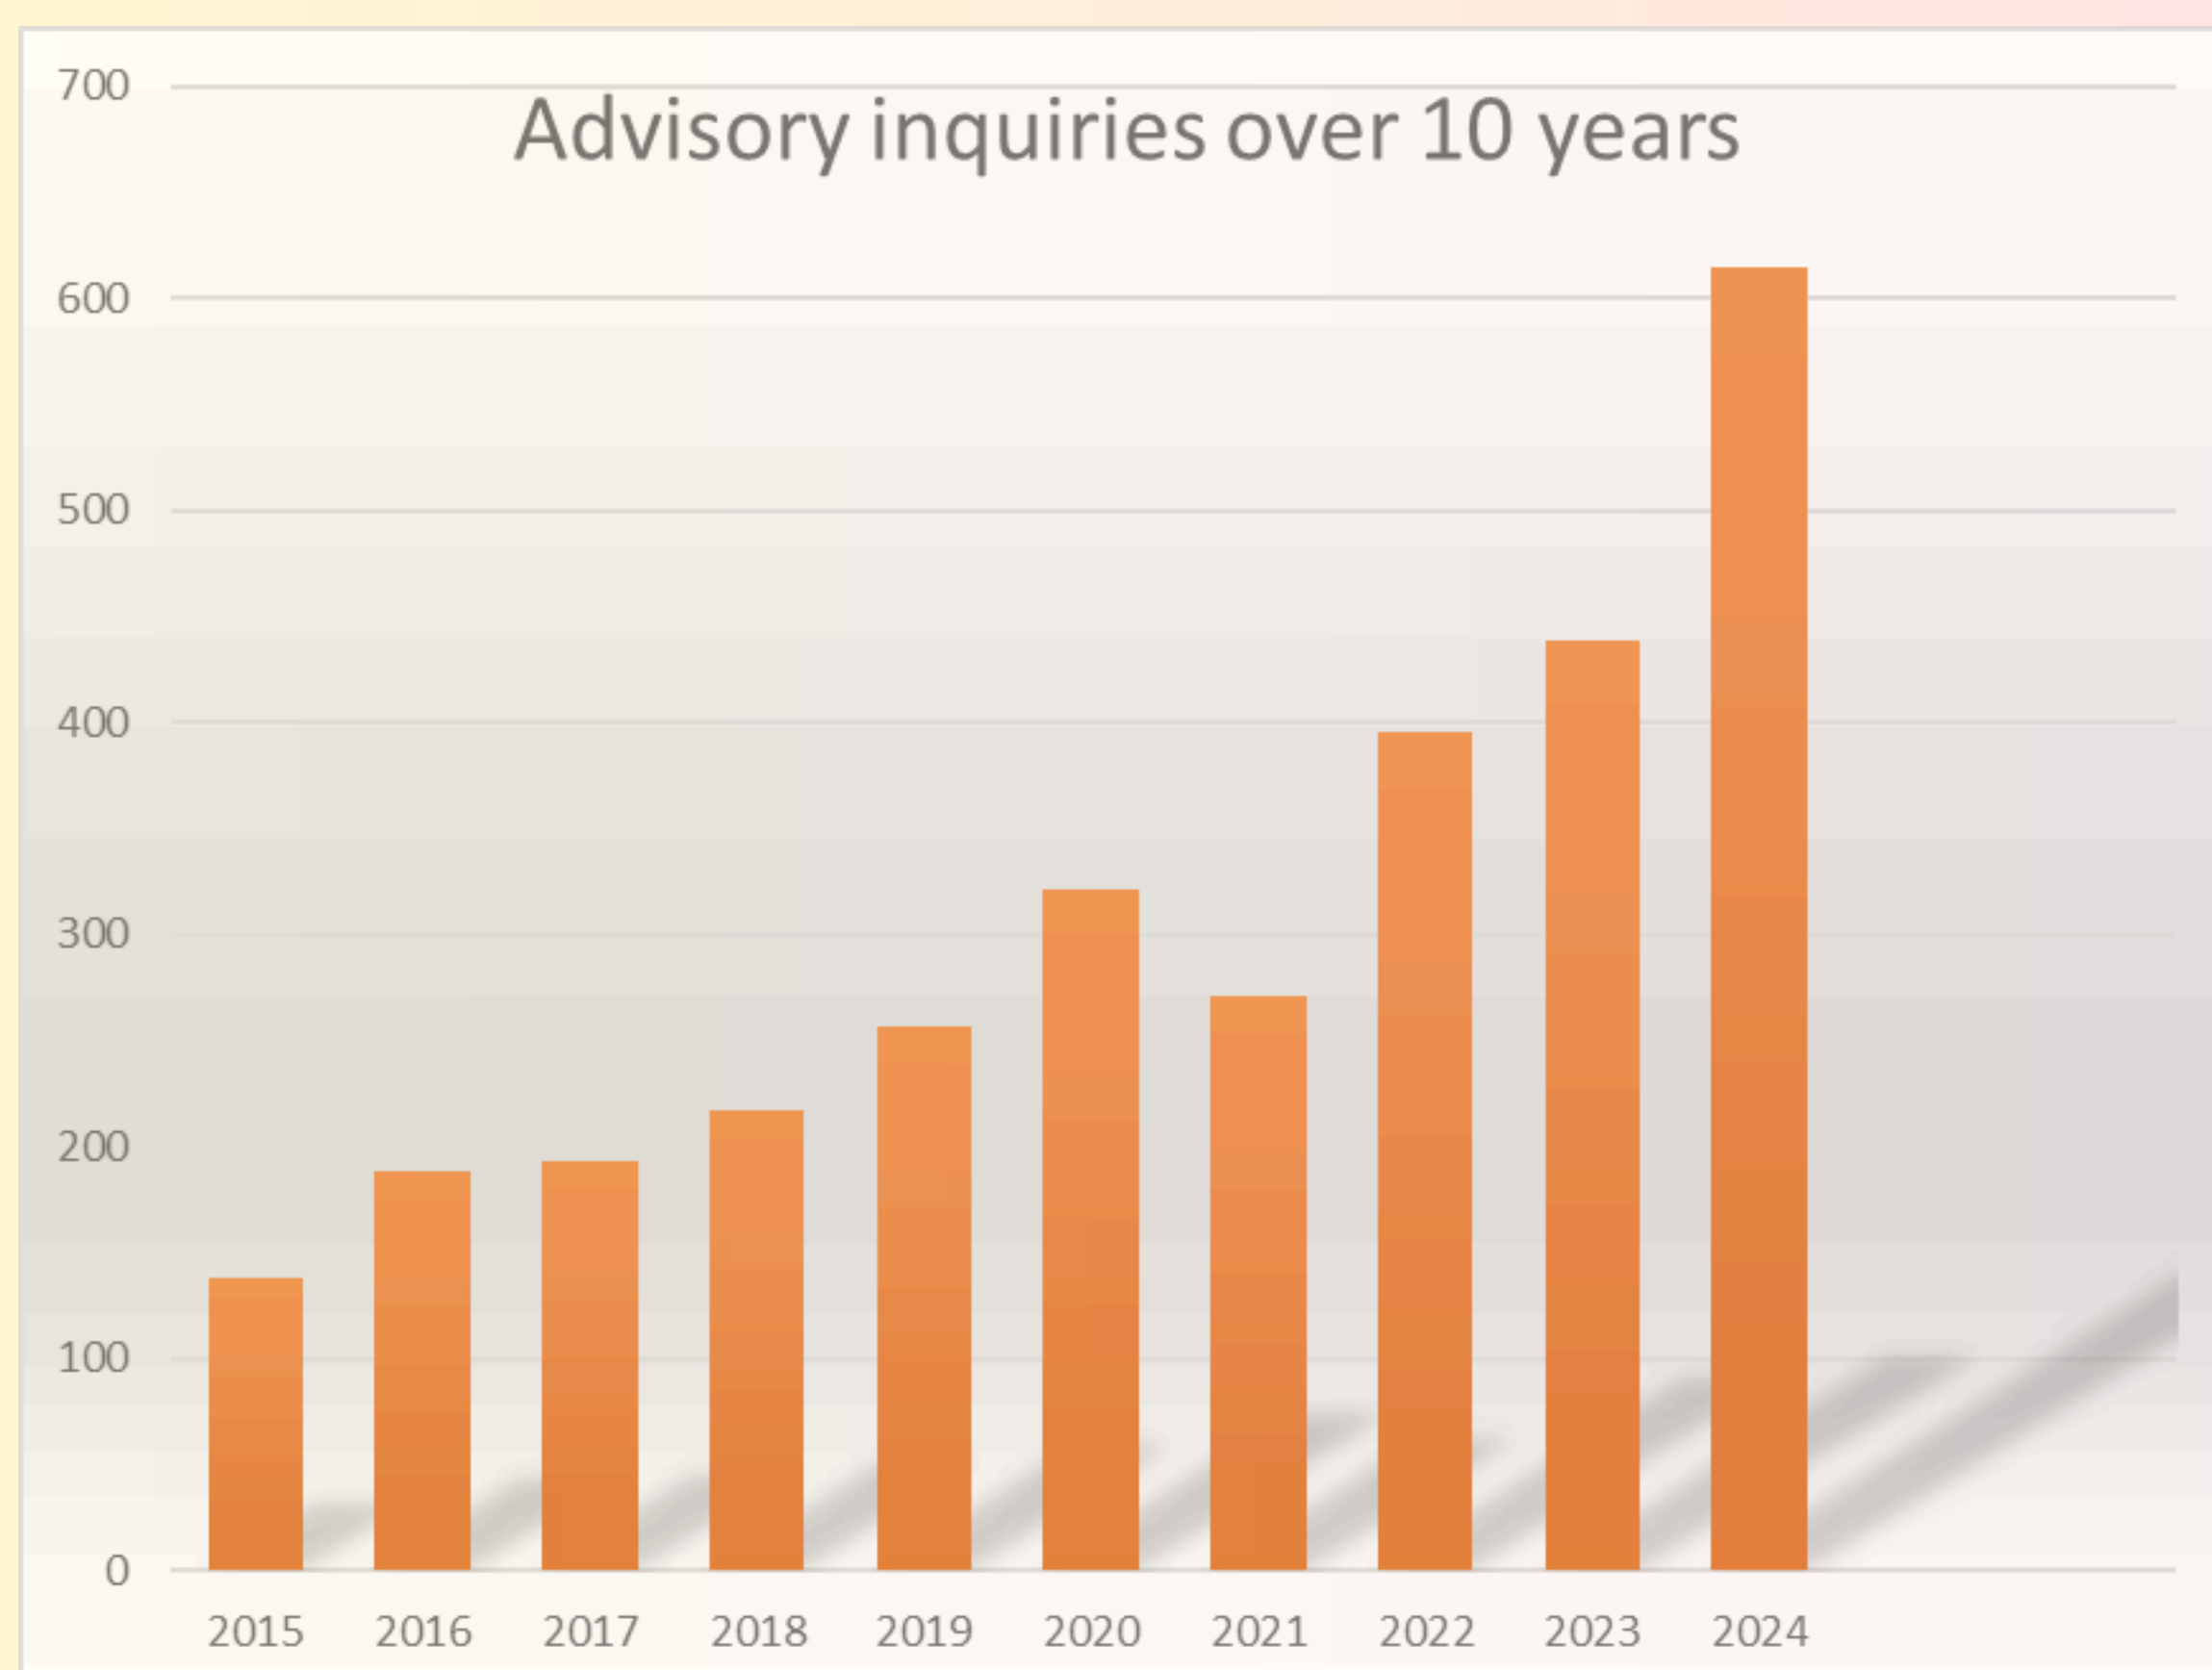

WHAT WAS DONE

10 years of expert psychopharmacological counseling to psychiatric departments and general practitioners.

CORE TASKS

- Advisory hotline
- Medication reviews
- Other: E.g. educational services, newsletter

ADVISORY HOTLINE

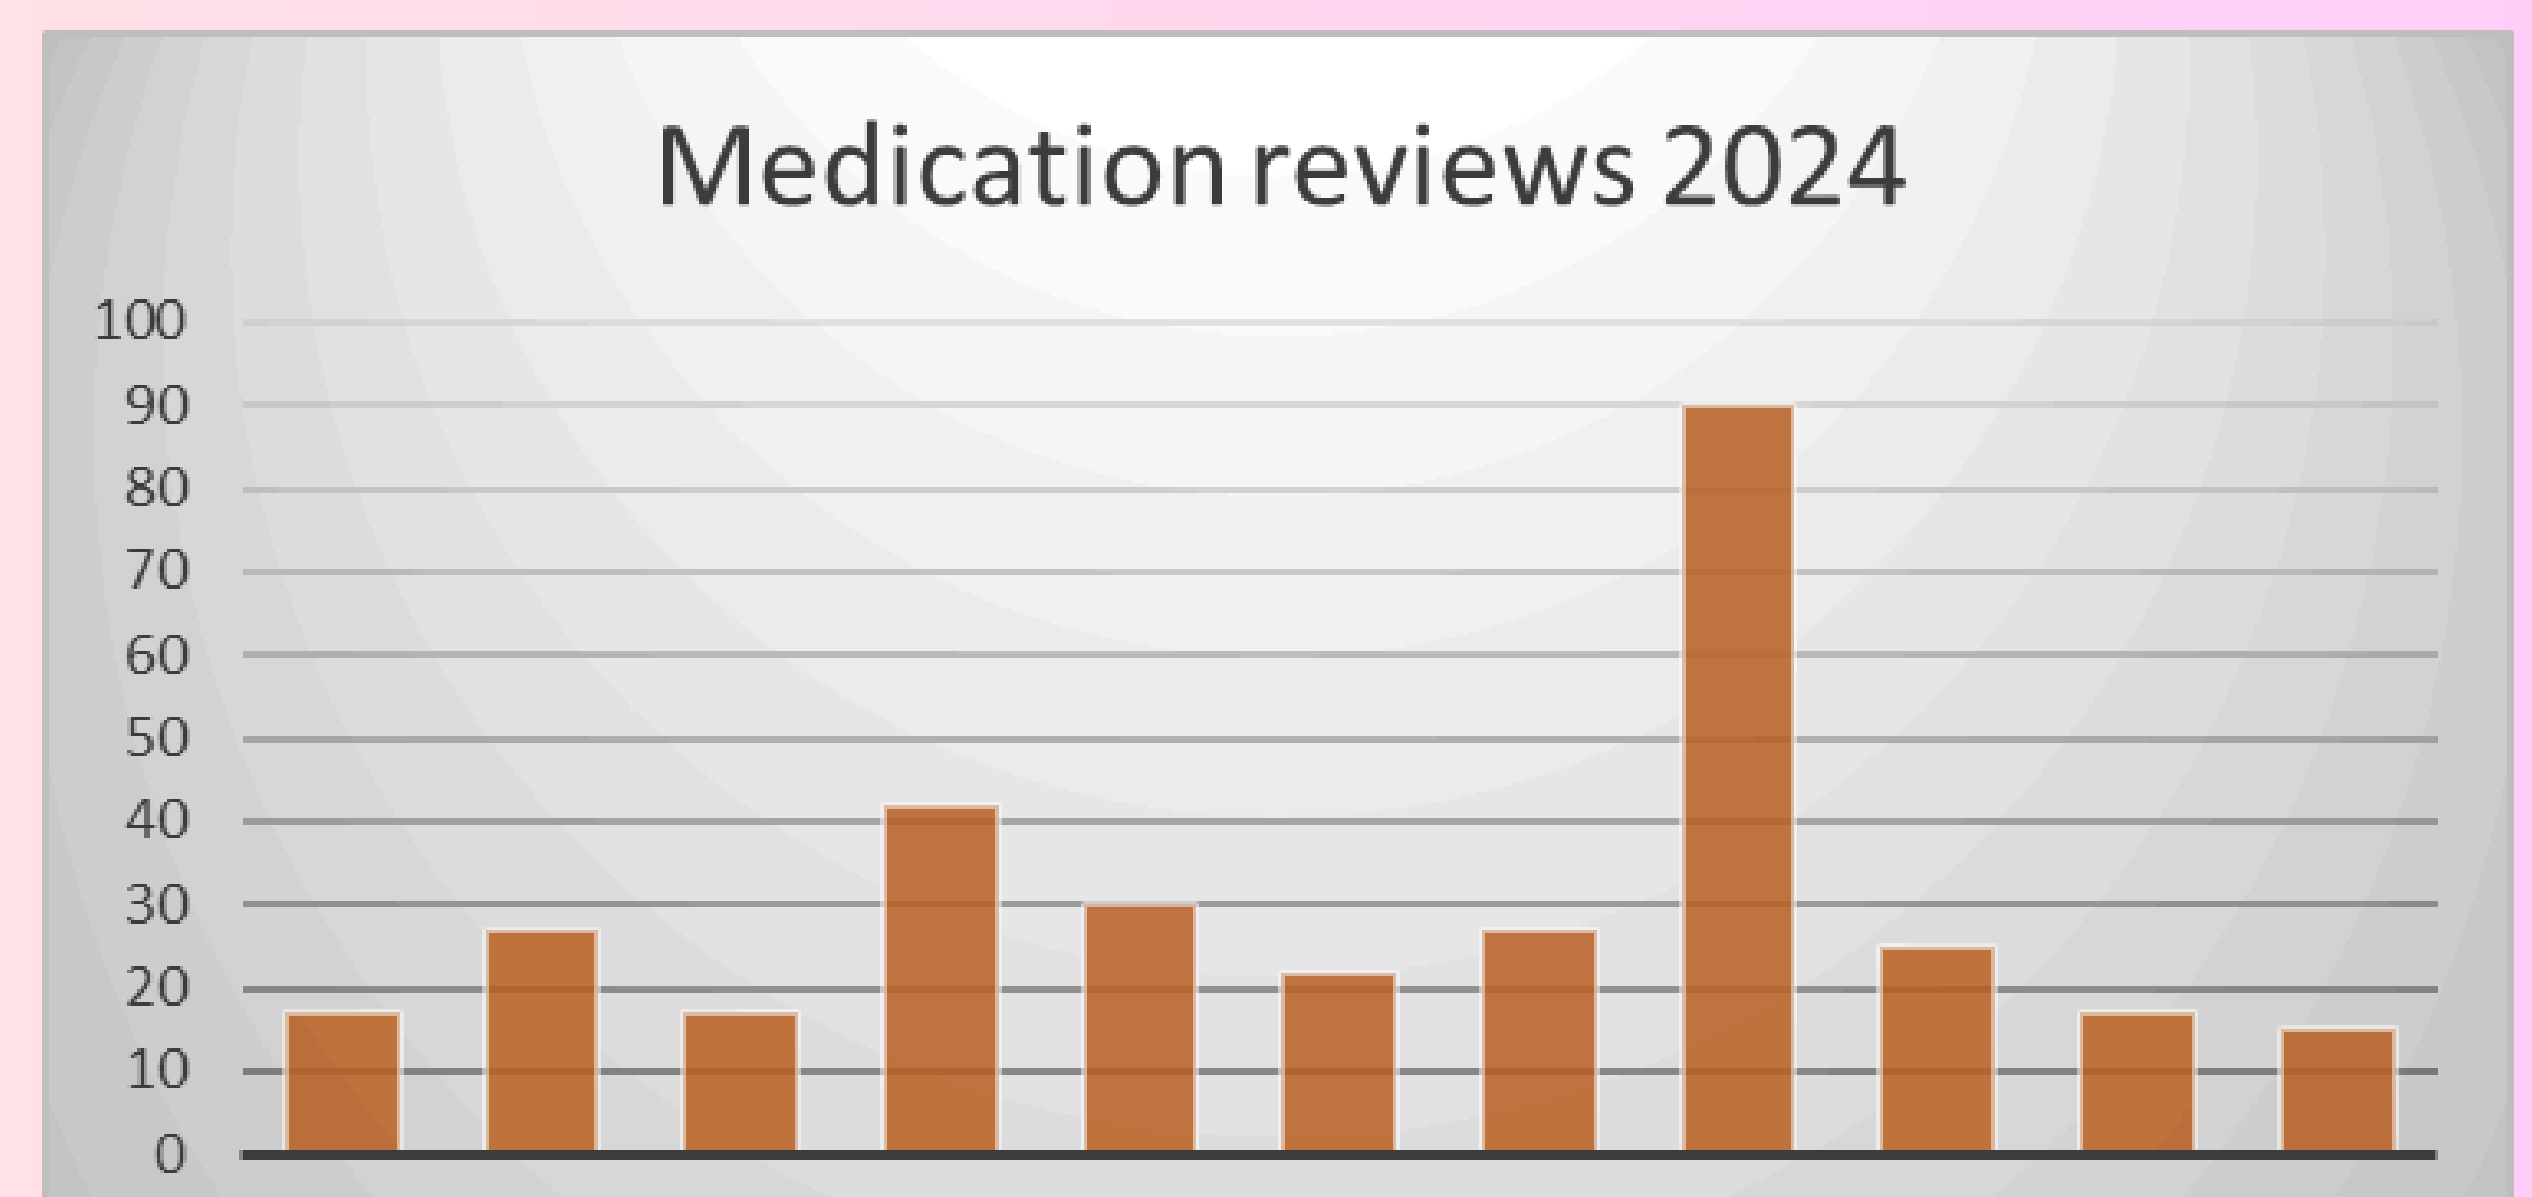

Users:

- 56 % General practitioners
- 32 % Physicians/psychiatrists psychiatric departments
- 8% Private psychiatrists
- 3% Other (e.g. nurses)
- 1% Pharmacists

Feedback:

- "Highly competent and prompt advice. I find it meaningful to optimize the patient's treatment in general practice, allowing the treatment to be managed there instead of at the psychiatric hospital."

MEDICATION REVIEWS

Users:

Psychiatrists/physicians at psychiatric departments

Feedback:

- "I am always deeply impressed by the thoroughness of the review and the comprehensive overview, including previous treatments, effects, potential side effects, interactions, etc. It is an invaluable help in a busy workday and contributes to the high quality of our work by supporting the correct choice of medication, thereby reducing the risk of prolonged treatment courses, readmissions, etc."

EDUCATIONAL SERVICES

E.g.

Antidepressant treatment for general practitioners
Briefings on a subject for psychiatric departments
Staff at nursing homes, psychiatric residential facility.

NEWS LETTER

Content:

Articles on psychopharmacology issues
Relevant information/new on psychopharmacology

Recipients:

All psychiatric departments
457 individual recipients in Denmark

4 editions a year

CONCLUSION

Given the demonstrated benefits, the role of clinical pharmacists should be further recognized and integrated into Denmark's healthcare system to support effective and safe pharmacotherapy.
